Paul Pholeros Foundation Registration Open for Team 2020

Plumbing and construction team onsite

Completed sanitation block

Aidan and Satyaman working together

Calling for Expressions of Interest for 2020

The Paul Pholeros Foundation PPF was established in 2018 to continue Paul's lifelong quest to improve people's lives. The Foundation currently focusses on small community based sanitation projects in Nepal.

The PPF 2019 team of plumber and media coordinator successfully installed plumbing infrastructure for a community toilet block located in an important holy area for the local Buddhist populations.

PPF Team 2020 - Registration of Expressions of Interest Open

The PPF is calling for Expressions of Interest for the 2020 team, a plumber and an architectural graduate under the age of 30, to travel to Nepal for 4 weeks work in March-April 2020.

The plumber will work with local tradespeople to install plumbing infrastructure and share skills and techniques with them, the architect will have input into construction and design processes as needed, and will document the works to produce materials that can be used for future skills training as well as in community information programs. The project sites are being finalised and will be linked to outreach centres of Dhulikhel Hospital, the PPF's partner in Nepal.

To register your Expression of Interest, visit
